/The New Uighurs/

563 576 mutual courtesy. In addressing one another they use the polite form of you. The same politeness is demonstrated between wife and husband. Parents use the equivalent of "thou" to address their children, servants or workers. Upon meeting a friend or entering a friend's house they say "As-salam Alaikum," and the reply is "Alaikum as-salam." They inquire about the health of the family, then bow and shake hands. Only women kiss when they meet, and only if they are related. When they part they say "Khosh," or "Allah Akbar," meaning, "The Lord is great."

563 576 594 264 [782] The more religious women pray before eating or starting to do something. Washing the hands before and after meals is mandatory. Bowls of water and towels are provided at a feast or banquet table, and hands are washed between courses. When a hostess serves refreshments to a guest, the guest rises, bows and says "Ishqallah," meaning thank you. Polite speeches are made by both host and guest on the guest's arrival and departure. Good manners are regarded as important.

4. Superstitions and taboos

563 771 [706] [708] [769] The New Uighurs attach superstition to almost everything. They believe in witches, ghosts, charms and talismans. As mentioned before, they believe in the powers of local saints and heroes, to whom they have dedicated innumerable shrines, and certain superstitions connect these shrines with the curing of disease and the bearing of children. Ancestor worship is also strong among them, as shown by the popular names of the shrines.

[756] [755] [789] 563 771 775 [782] [825] The people are also firm believers in witch-doctors, and in magic powers that cure disease, induce love, or sow enmity between people. Ghosts are much feared, especially the ghost of a Chinese. People regard the Urumchi Road from Kashgar as a haunt for Chinese ghosts. They believe that if one is haunted he may be able to propitiate the ghosts by leaving money on his doorstep overnight. If the money is gone in the morning, the ghosts have taken it and will make no further trouble. They also have a superstitious dread of snakes, and believe that if one kills a snake, its mate will haunt him.

563 372 [799] 563 821 The New Uighurs try to maintain an everlasting fire in their fireplaces, to bring prosperity to the house. Ashes from the fireplace are carried out at night or before sunrise, for to clean the fireplace and take out the ashes during the day may bring misfortune to the household. They fear thunder, and during a thunderstorm they pray for deliverance from threatening danger.

5. Religious celebrations and festivals

563 796 Like the festivals of Moslems the world over, the festivals of the New Uighurs are deeply colored with religious influence. Besides Fridays, which are generally celebrated, the people have only three main holidays, Rōse-hāyt, Kurban-hāyt and

of which was full of tamarisk mounds. Many of these stood twenty feet high, and here, as everywhere in the desert, each plant was raised on a mound accumulated round its roots, this being the soil blown by the wind from some more fertile region. Among the tamarisks were plants of Saksaul (*Anabasis Ammodendron*), whose contorted stems, grey cracked bark, green plumes of small greyish leaves, and pink fruit differentiated them from the more feathery species. It has been computed that these tamarisk hills may be from 500 to 1000 years old. The trunks of a forest of dead poplars stood beyond, and added a final touch to the desolation of the scene.

Tsikioking—'The Seven Cornered Well'—stands in the sandy basin, and is now a place of some importance, boasting a small Government Official who also controls the post-office. It is here that the roads divide which lead from Hami to Turfan, and Hami to Kucheng. We were following the latter, but the telegraph wire went via Turfan to Urumchi. Great as was our desire to see Turfan—a most interesting locality—we realised that it was scarcely safe to enter such a hot area at midsummer. We were warned that at this season people were dying from heat, and that the inhabitants protected themselves by spending the hours from sunrise to sunset in underground cave dwellings. The Turfan depression descends to two hundred feet below sea-level, and presents conditions most favourable to agriculture but almost insupportable to man: Tsikioking is better supplied with fuel than any of the surrounding oases, and in winter its population is increased by families who move here for those months. The best fuel known in the desert is the root of the tamarisk. It is of dark hard wood which, chopped into small pieces and sun-dried looks like coal, and has a great deal of its burning

372 qualities. Several of the desert plants and roots supply fuel of fair quality, but in most places the people are dependent on animal droppings, cow dung being the best variety since, well dried, it gives out a glowing heat.

647 A visit to the Official brought us once more into the tragic conditions of Yamen life. A young man, with signs of the opium habit upon him, received us with the usual Chinese courtesy, and introduced his wife, who was a nice-looking and self-respecting girl; but there were other women in the household of such a character as must have made existence in Tsikioking a living death to her.

CHAPTER XXXIX

THROUGH THE CELESTIAL MOUNTAINS

133 491 At Tsikioking we were within a few miles of the outer foothills of the Tian Shan, which, on the next stage, we were to traverse from south to north. No sign of the Pass, however, was evident, and it was not until we had covered the first few miles of gently rising ground that we found the road took a sudden turn, and we then quickly entered the mouth of a narrowing gorge. At the entrance to the ravine the yellow sand was piled up on the windward side of the rocks to the height of several hundred feet, but as we advanced naked blackness met the eye on every side, and from here on, a rift through the black rocks sliced a road right across the Celestial Range to the plain of Dzungaria.

For nine hours we followed a narrow path, the gradient rising so evenly as to be scarcely noticeable. The high rocks on either side were absolutely denuded,

be a Qazaq. She wore a printed cotton gown to her ankles, and over it a striped coat, cut with an old-fashioned waistline, and down the back seam the stripes met in fishbone pattern, while her head and face were swathed in the nunlike headgear worn by all Qazaq women. A call from our driver brought an acquiescing response from her, and he drew up as she now moved toward the great mound of drying cow-dung, which is the inevitable adjunct to the Qazaq home. Her fireplace was of the simplest, a deep hole hollowed in the ground, and three iron rods and a hook, from which a kettle hung. She dexterously placed the cakes of cow dung on the embers, and blowing on them, in a short time there was a glowing fire and a singing kettle. One of her children was seen carrying water from the spring, while the other was collecting fuel, but both now came running to see us. Accepting her invitation we entered the tent, and here found her husband, a Honan man, lying down with the hateful opium pipe by his side. Nevertheless, with the manners of a gentleman, he at once rose, spread a carpet for us, and with a gesture placed his pipe at our disposal, but adding as he did so: 'You have none of these bad habits in your country.' We sat and talked with this intelligent man, who for some unknown reason had left China, wandered across the desert, and thrown in his lot with the Qazaq people, taking one of their women to be his wife and the mother of his children. Another of these enigmatic people gathered in this strangest of countries, where a man's past is known only to himself, to be buried and forgotten.

While we were talking Sandy Macnab was working. Producing a length of cotton material, of suitable size and shape to fit between the shafts of his cart, he proceeded to fasten it so as to form a feeding trough, in
